# NECD 2020 reporting at glance (Annex I)

- 28 Submissions
- 21 Resubmissions
- 7 Corrections

# Good feedback from 2020 Reporting

## COMPLETENESS

- Almost all Member States reported full time series for all the pollutants

## ANNEX I TEMPLATE

- All Member States used new Annex I

# Improvements from 2020 Reporting

## INTERNAL QA/QC

- Internal QA/QC before reporting

## CDR

- Improvement in using CDR are required to improve support

# Engagement with Reporters

- Webinar for Reporters with Guidelines
- [Tableau Dashboard](#)
- Email with information on harvesting failures and request of resubmission

# Internal QA/QC

- **FORMAT OF CELLS B4 – B6 CHANGED**
  - Wrong calculation of National Total for Compliance
- **NOTATION KEYS**
  - “NOI”, “True”, “I.E.”, “IE, NO”
  - Format of the cell not readable (copy/paste from different files?)

- **REPORTING “OUT OF SCOPE”**
  - Empty sheets with already existing inventory years (1990, 2005) or
  - with out of scope inventory years (2019, 2020)
  - Annex VII within Annex I
- **ALTERED ANNEX I FROM 2014 VERSION**

# CDR Envelopes

- **Changing envelopes content after submission**
  - This makes complicated to track findings and support Member States
  - This practice is not recommended
- **Resubmissions**
  - If you are planning a resubmission be aware of deadline: rushing a resubmission may result in many of them (up to 5 and far away from 15<sup>th</sup> March deadline)

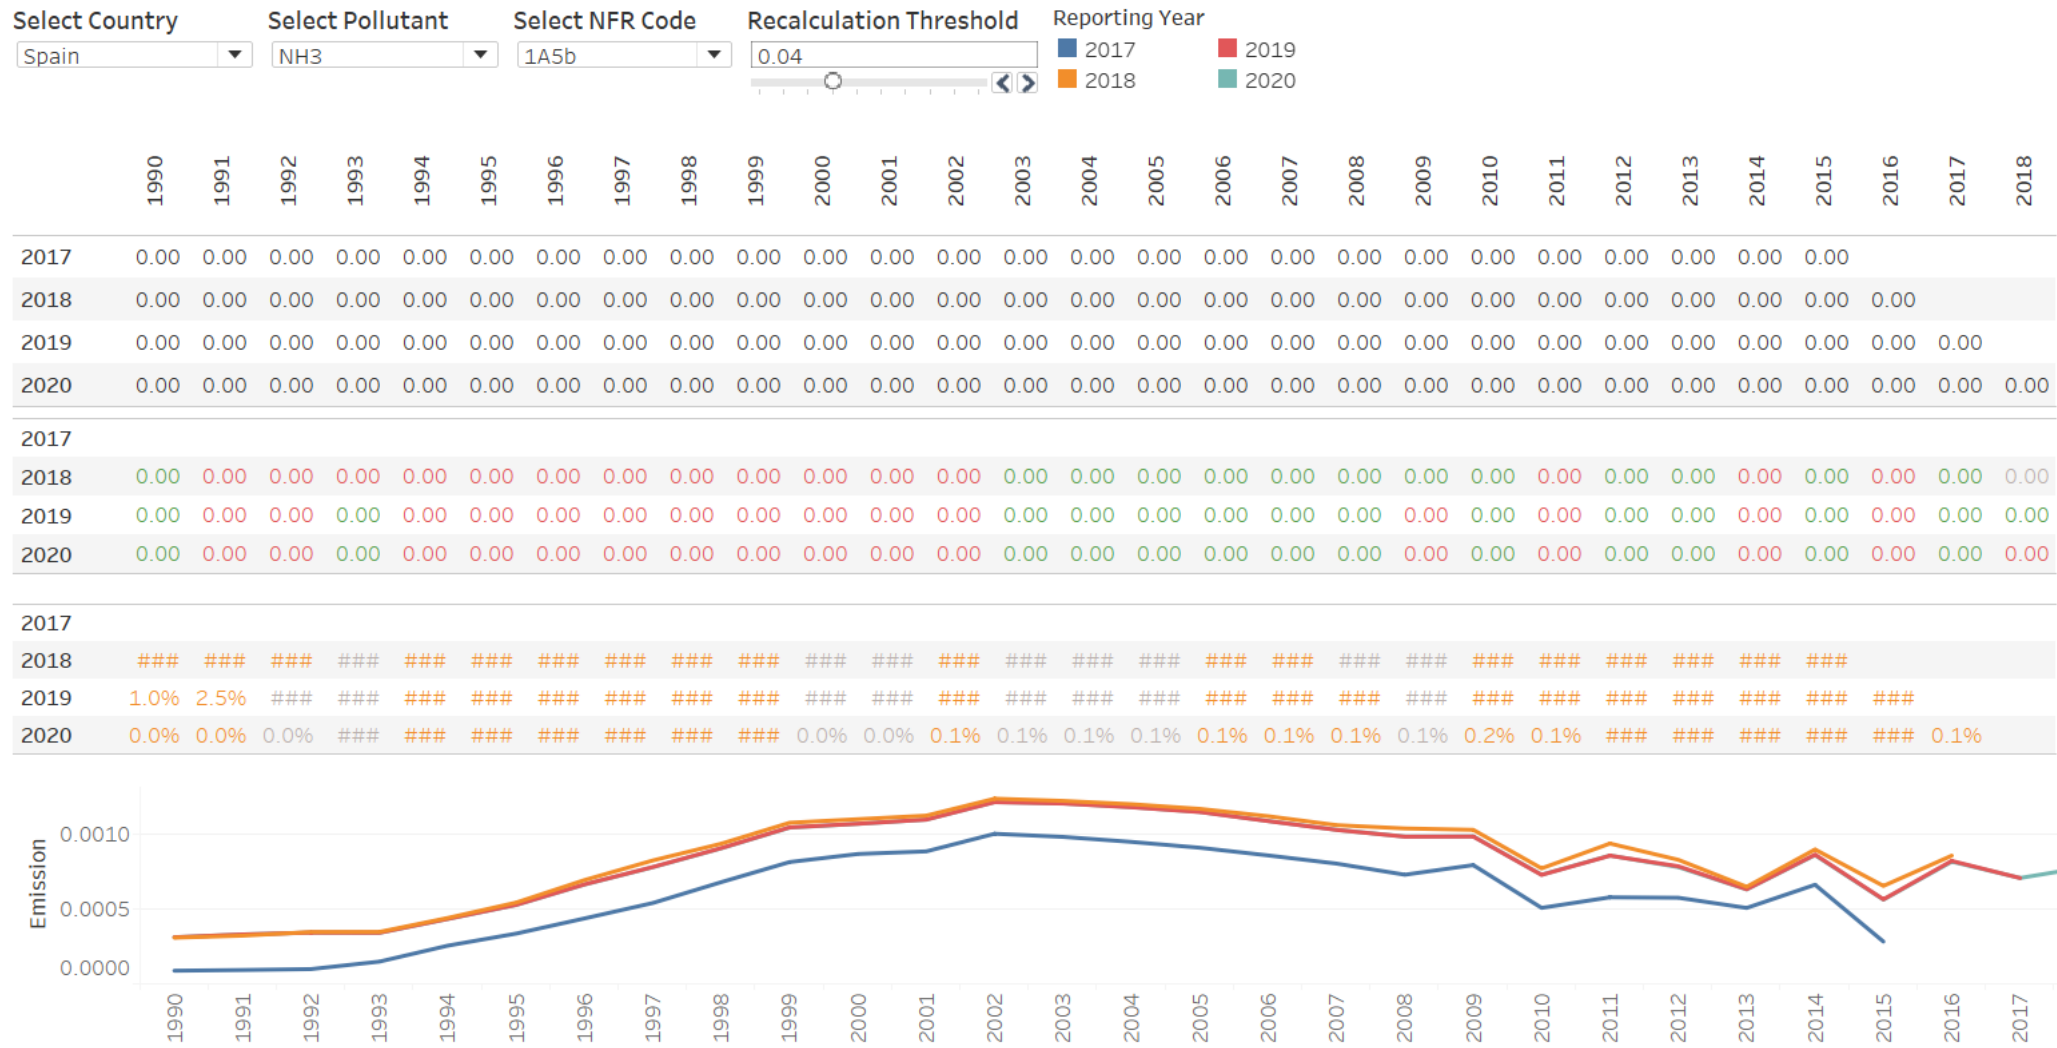

# Other lesson learnt from 2020 – LPS & GRID

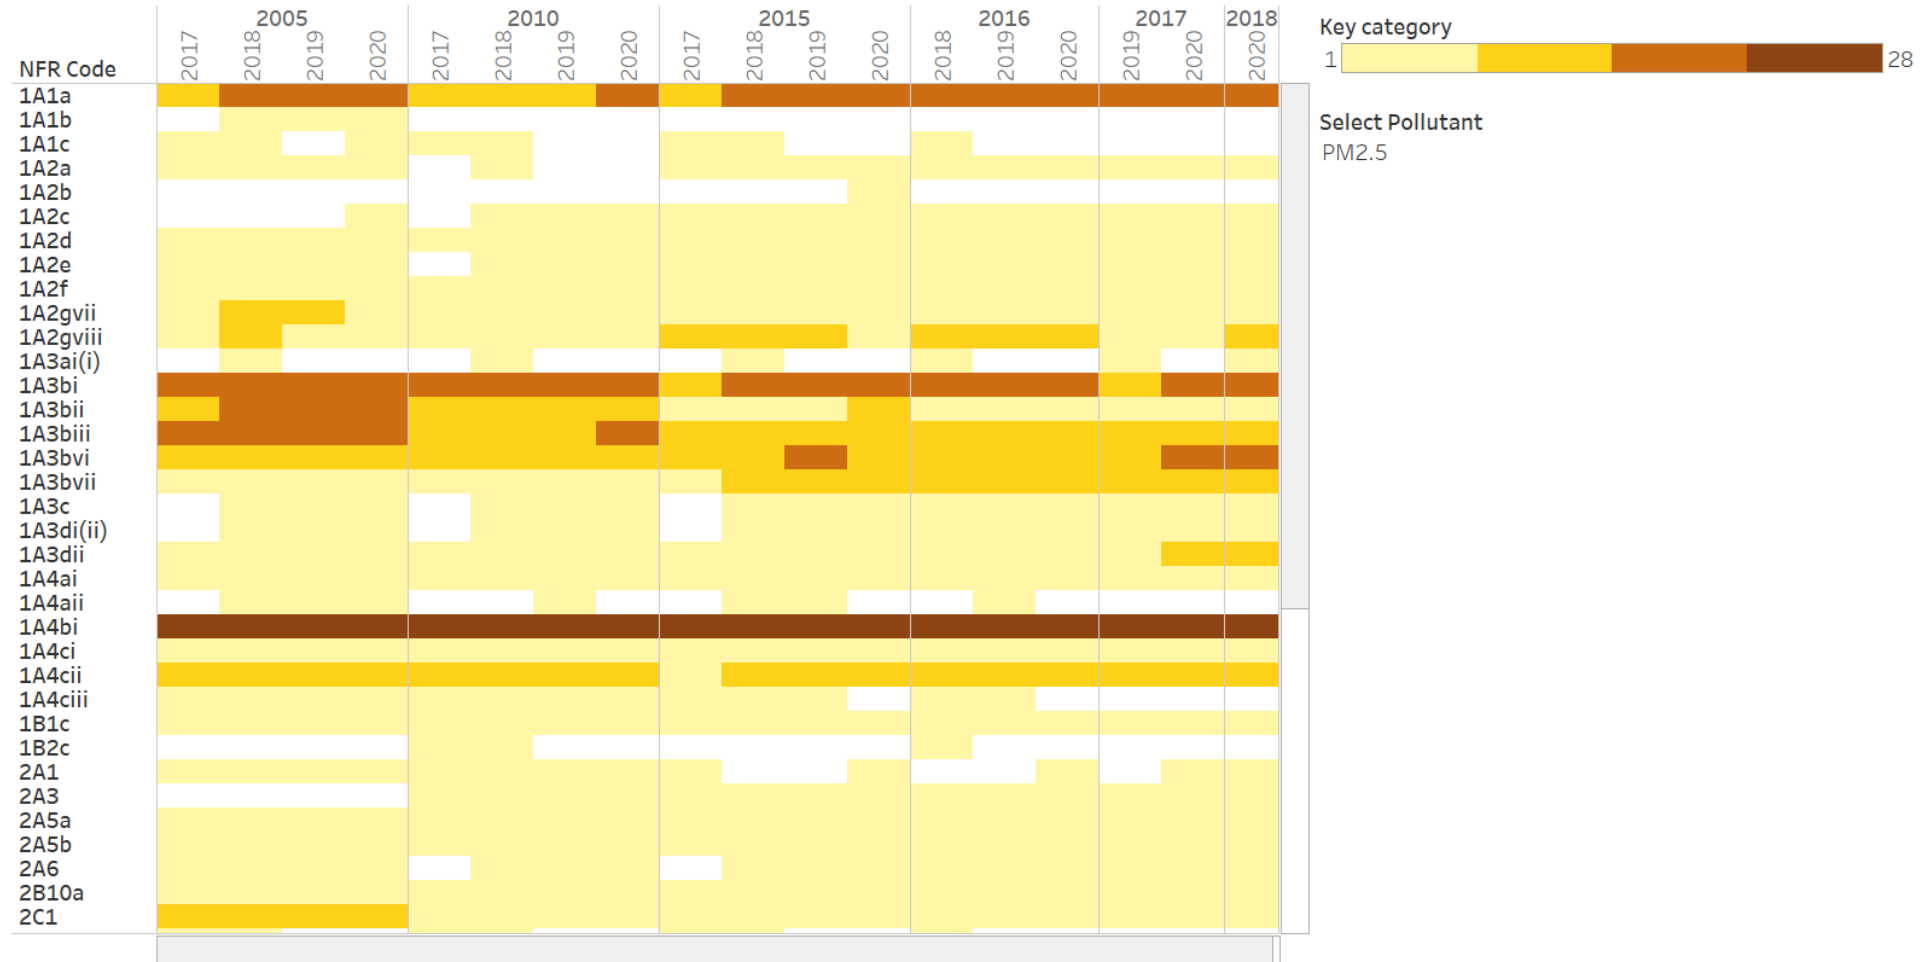

- **REPORTING OF GNFR CODES:** Annex V and Annex VI list the GNFR sector that **MUST** be used
  - Many MS report their own GNFR Code
- **COORDINATES REPORTING**
  - Longitude and Latitude swapping
  - Format of coordinates not consistent with reporting template
- Lack in using **NOTATION KEYS** in both Reporting: empty cells reported instead
- **REPORTING OF DUPLICATES**
- **“OUT OF SCOPE” INFORMATION:** reporting of subtotals
