

TFEIP 2022 – Introduction

TFEIP co-chairs: Chris Dore, Martin Adams and Kristina Saarinen

1. Work Completed since SB2021

Updated Technical Guidance

- **Adjustments** (within an ERC framework)
- Emissions from **solvents**
- **Agriculture** – not finalized/circulated

Contributions to GP Review discussions and documents provided where appropriate.

2 TFEIP Management

TFEIP

EIONET

Direct support from the EEA's EIONET has stopped

Expert Panels

Changes to TFEIP's expert panel leads

- **Combustion & Industry**

New panels/roles

- **Waste**
- **User Engagement**

3. Updating the EMEP/EEA Guidebook

- To be finalised by May 2023 (at TFEIP2023)
- Work to be primarily undertaken across the second half of 2022
- **Updating** rather than fundamental changes, and dependent on resources
- Of particular focus are:
 - Methods that account for changes in temperature
 - Regionally specific EFs (where appropriate/possible)
- **... all dependent on securing funds/support**

4. Other Priorities:

Annex IV Projections reporting template:

- Updates to be agreed.

Review of Emissions Reporting Guidelines

- A “simple” update for clarification/corrections
- We will also discuss reporting in more detail, in preparation for the possible revision of the Gothenburg Protocol
- A technical working paper might help to support future discussions.

4. Other Priorities

Condensables

- TFEIP to contribute to the ad hoc group as resources permit.

Review of the Gothenburg Protocol

- More on this later.

Thank-you
